DETAILED ACTION

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because it is missing the signature of the Applicant.

Claim Rejections - 35 USC § 112

Claims 1 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "a directing flange" in lines 4 and 5.

Claim 4 recited the limitation "said positioning member" in line 2.

There are insufficient antecedent bases for these limitations in the claims.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3653

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Patent Number 6,059,651 by Abe et al. The coin ejecting apparatus disclosed by said '651 patent incorporates plate 15 and roller 23 that read on the Applicant's directing flange and ejecting element, respectively.

Allowable Subject Matter

Claims 10-18 are allowed. Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Patent Number US 6,695,689 B2 by Abe because of its roller 133,

Patent Number US 6,352,472 B1 by Tsuchida et al because of its change roller 53, and

Patent Number 5,931,732 by Abe et al because of its edge plates 24 and 25.
